

**QR codes** are pictorial representations of website and other links that can be scanned directly to your browser using a smartphone i.e iPhone or Blackberry. They are a simple and easy way for people to be linked to online content without have to type in an address to link text.

As defined by Wikipedia - A QR Code is a matrix barcode (or two-dimensional code), readable by QR scanners, mobiles phones with camera, and smartphones. The code consists of black modules arranged in a square pattern on white background. The information encoded can be text, URL or other data. See [http://en.wikipedia.org/wiki/QR\\_Code](http://en.wikipedia.org/wiki/QR_Code) for more information.

This Document provides the QR codes for the Kasemkij, Cape Collection, Kantary Collection and Kameo Collection websites as well as the QR codes for our main social media pages including Facebook, YouTube Channel, Twitter, Blog, Flickr and Photobucket account.
